

FIBRE SURVEY LEAD - UK

Reporting to

Project Manager

Place of Work:

Predominantly site based with some desktop reporting work – nationwide but generally tends to be regional depending on work allocation from our expanding Client base. Travel to and from site is an integral part of the job. Initial locations in Coventry, Huddersfield, Northampton & Lowestoft.

Roles and Responsibilities:

The key responsibilities for the successful candidate will include:

- Lead a team of fibre surveyors
- Mentor and develop new team members
- Liaise with design team to plan optical fibre paths and produce maps and drawings
- Assist with capacity planning
- Adhere to Client specific procedures and specification.
- Carry out dynamic risk assessments on site prior to work commencing and report any visible hazards or defects from site by way of a “red flag” early warning system.
- Implement control measures as required to enable the survey to be completed in a safe manner.
- Accurately record all existing site information and propose the most practical & cost-effective solution based on client specification and any known constraints.
- Validate the HLD (high level design) and note any issues/dependencies.
- Act responsibly when attending any survey and protect the interests of both 4Site and the Customer always.
- Be professional, safety conscious and conscientious at all times both on and off site.
- Liaise with all those involved on site at survey including local authority representatives, landlords, council officials and any other 3rd party.
- Collate the information gathered in a concise & legible manner incl. survey notes, sketches, photos and present it clearly for submission to the Client.
- Compile all project specific reports and associated documentation with a strong focus on quality, deadlines and deliverables.
- Liaise with and update the 4site FTTH PM.
- Escalate any issues or blockers immediately and provide support as required.
- Assist with resolving any queries to enable design to progress as quickly as possible.
- Comply with company policies/procedures without exception.
- Adhere to mandatory Health & Safety legislation without exception.

innovation engineered
